- **Front End:** HTML • CSS • React • Redux • Bootstrap
- **Back End Server:** Express.js • FastAPI
- **Programming Languages:** Python • JavaScript • SQL
- **Version Control:** Git • GitHub
- **Testing:** Postico • Jest
- **Cloud Provider:** Heroku
- **API:** REST
- **Container:** Docker

PROFESSIONAL EXPERIENCE

Insurance Service Group – CSR

Minneapolis, Minnesota • May 2025 – Present

- Handle 30–60+ daily inquiries via phone and email for the State Farm audit team, interacting with clients and agents and providing support through an internal portal to ensure accuracy and timely resolution.
- Document case notes with accuracy to ensure compliance and seamless handoffs between audit and client-facing teams.
- Recognized for strong problem-solving and empathy, interacting with clients and agents while balancing technical detail with customer-first communication and portal-based support.

Amazon – Driver

Minneapolis, Minnesota • Jan 2023 – Feb 2025

- Optimized daily delivery workflow, sequencing stops strategically to reduce drive time while maintaining precise and safe execution.
- Delivered 200+ orders per shift, resolving customer concerns quickly to ensure high satisfaction.
- Maintained error-free package handling and 98%+ delivery accuracy, contributing to overall team performance goals.

PROJECTS

[InteractiveHip-HopTimeline](#) (Sole Contributor)

Jan 2025

- Developed a mobile-friendly React application with Tailwind CSS, integrating a FastAPI backend powered by OpenAI's GPT-3.5 to generate dynamic Hip-Hop artist timelines, and deployed the full-stack system on Vercel for scalable, reliable performance. – [Live Demo](#)

[Pokedex](#) (Sole Contributor)

Nov 2024

- Built a full-stack Pokedex application with user authentication, RESTful APIs, and Redis caching to improve data retrieval speed and support scalable performance; containerized the application using Docker for consistent deployment across environments and implemented Jest unit tests to validate UI functionality and prevent regressions

[Mind Wisk](#) (Contributor)

Dec 2023

- Led backend routing, database schema design, and Axios API integrations for a donation-driven e-commerce platform, ensuring reliable data flow and consistent code quality.

EDUCATION

- Prime Digital Academy – Software Engineering Student

Minneapolis, Minnesota • Jun 2023 – Dec 2023
